Product Description

Pioneer G6500- 50PGEN Portable Generator

The Pioneer 6500-Watt Portable Generator delivers more power for a wide range of uses from home emergency backup to job site applications. With an 8200-watt surge capacity and 6500-watt running output, it can easily run essential appliances, tools, and equipment during power outages or for outdoor projects and activities. Designed for durability, portability, and reliability, this generator delivers stable performance when it's needed most.
