Product Description

Pioneer PC7600iRDC Dual Fuel Inverter Generator

The Pioneer 7600-Watt Dual Fuel Inverter Generator offers exceptional versatility and reliable performance, ideal for activities requiring heavy power use. Capable of running on gasoline or propane, this unit automatically switches fuel intake between gasoline and propane to extend its runtime while delivering power to larger appliances, tools, RVs, and sensitive electronics. With the convenience of user-friendly controls and remote starting, long run times, and a durable yet portable design, this generator is a perfect home power backup solution.
